

SIVA KISHORE REDDY ALLU

Data Engineer

Cincinnati, Ohio | +1 5137480792 | sivakishoredreddyallu@gmail.com | linkedin.com/in/kishore0451 | github.com/k1sh0r3 | kishore.run

PROFESSIONAL SUMMARY

Data Engineer with nearly 3 years of experience designing ETL pipelines, data warehousing solutions, and analytics on AWS (Glue, PySpark, S3). Recently building AI-era data tooling: an MCP-based SQL safety layer for AI agents, a pull-request reviewer for AI-generated SQL, and a column-level data lineage explorer. Track record of measurable impact — 30% faster queries, 40% less manual data handling — paired with an M.S. in Information Technology (3.7 GPA).

TECHNICAL SKILLS

Programming: Python, SQL, TypeScript, JavaScript, PySpark, Shell/Bash, Java

Data Engineering: ETL Pipeline Design, Data Warehousing, Data Modeling, Delta Loads, AWS Glue, Apache Spark, XML/JSON Parsing, Pandas

Cloud & DevOps: AWS (S3, EC2), Docker, GitHub Actions (CI/CD), Git

AI / LLM Tooling: Model Context Protocol (MCP), Validation of AI-Generated SQL, LLM Guardrails

Visualization & APIs: Tableau, REST APIs, Node.js, Flask

PROFESSIONAL EXPERIENCE

Project Engineer | Wipro Ltd — Bengaluru, India Jan 2020 – Feb 2023

- Engineered a modular Python framework automating XML file processing, cutting manual data-handling errors by 40% and streamlining downstream data ingestion.
- Built and optimized ETL pipelines with AWS Glue and PySpark for enterprise clients (GENEMS-ERP; ANZ across NZ/AU regions), enabling reliable large-scale data migration.
- Implemented delta-load logic on AWS for legacy migrations, improving data accuracy while minimizing downtime.
- Developed interactive Tableau dashboards that improved SQL query performance by 30%, supporting data-driven decisions across cross-functional teams.

PROJECTS

PreSQL | SQL Safety MCP Server for AI Agents — github.com/k1sh0r3/preSQL Oct 2026

- What it does:** Built a TypeScript MCP server (npm: [@k1sh0r3/presql](https://npm.com/@k1sh0r3/presql)) exposing `validate_sql`, `explain_sql`, and `guard_query` tools that vet AI-generated SQL against a live schema before execution.
- Safety impact:** Blocks destructive statements (e.g., `DELETE/UPDATE` without `WHERE`) and explains queries in plain English; 41/41 automated tests passing with zero database connection required.

SQL Sentinel | Code Reviewer for AI-Written SQL — k1sh0r3.github.io/SQLSentinel Oct 2026

- What it does:** Shipped a web app that validates SQL against a schema (13 check codes: unknown columns, PII detection, missing `WHERE` clauses, cross joins) with `safe` / `review` / `blocked` verdicts.

- **Automation:** Built a GitHub Action that reviews SQL in pull requests and posts verdict comments; live-tested by blocking a destructive DELETE in a real PR.

BlastRadius | Column-Level Data Lineage Explorer — k1sh0r3.github.io/BlastRadius Oct 2026

- **What it does:** Built a 100% client-side app that converts dbt manifest.json files or raw SQL into an interactive column-level DAG — click any column to trace upstream lineage and downstream blast radius.
- **Engineering:** 24/24 tests passing; SQL parser vendored locally so the tool runs fully offline with no backend.

HireRadar | Visa-Friendly Job Board with Daily Data Aggregation — k1sh0r3.github.io/HireRadar Oct 2026

- **Pipeline:** Built a job board backed by a scheduled GitHub Actions pipeline aggregating JSearch, Adzuna, and Remoteive feeds, with dedup, 30-day pruning, and new-listing detection.
- **Data quality:** Added automated description formatting (section-header detection, bullet normalization) applied consistently across all current and future listings.

EDUCATION

M.S., Information Technology | University of Cincinnati — Cincinnati, Ohio Aug 2023 – Dec 2024

- GPA: 3.7/4.0

B.S., Computer Science and Engineering | Rajiv Gandhi University of Knowledge and Technologies — Basar, India 2015 – 2019

- GPA: 8.2/10

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Google Cloud Professional Data Engineer
- Microsoft Azure Data Fundamentals
- Databricks Certified Data Engineer Associate
- Snowflake SnowPro Core
- Python for Data Science — LinkedIn Learning (Apr 2024)
- Amazon EC2 Essential Training — LinkedIn Learning (Apr 2024)
- Full-Stack Development (MongoDB, Node, React) — LinkedIn Learning (Mar 2024)
- Intermediate Problem Solving — HackerRank (Dec 2023)

PUBLICATIONS

- **“Image to Text Deep Learning Model”** — IJRTE (Nov 2019): CNN-based approach converting image patterns into textual data for automated document processing.
